

Star Cutter Company Job Description

Job Title: Manufacturing Engineer

Location: Ossineke Industries
Ossineke, MI

Reports to: Engineering Manager

General Summary

Ossineke Industries is seeking an Electrical/Manufacturing Engineer, who will contribute to the future success of the company by significantly contributing to the engineering processes necessary for the performance of machines used for the manufacturing of gun drills and other products.

Responsibilities

- Confer with other engineers, sales, and customers, to discuss existing or potential engineering projects and products.
- Assist in manufacturing, construction, installation, maintenance, support, documentation, and testing activities to ensure compliance with specifications, codes, and customer requirements.
- Prepare specifications for purchase of materials and equipment.
- Evaluate and develop manufacturing methods, making continuous improvements to workflow processes.
- Through collaborative efforts, work with design and quality teams, as well as shop floor supervisors, to ensure process methods are running at optimum efficiency.
- Assess and evaluate tool failures, making appropriate recommendations.
- Work with Design Engineering Team to implement new product improvements and product development.
- This person will have Project Engineer responsibilities, taking the technical lead and project management roles to ensure projects are adequately managed to the direction of the business owner.

Knowledge and Skills

- Proven ability to influence cross-functional teams without formal authority.
- Ability to operate with minimal supervision, evaluate risk and make appropriate decisions.
- High-energy self-starter who is enthusiastic and motivated to create growth opportunities.
- Solid written, verbal communication, and presentation skills to interface with external sales teams and customers.
- Ability to operate various software applications, such as CAD, ERP, and Microsoft Office products.

Education Requirements

- Bachelor of Science Degree in Engineering with technical experience in design and manufacturing preferred.

Experience Requirements

- Product experience in a manufacturing company a plus.
- 5+ years of experience preferred.
- The ideal candidate will have a proven track record in engineering leadership with the ability to develop detailed specifications and implement standard engineering practices. Final output is required to be a reliable product that is complete with a detailed documentation package upon project completion

Equivalency

- A combination of relevant education and experience may be used to meet current position requirements.
